LOSS Team is a team of First Responders and trained survivors who would go to the scenes of suicides to disseminate information about resources and be the installation of hope for the newly bereaved. The primary goal of the Active Postvention Model is to let suicide survivors know that resources exist as soon as possible following the death.

Dr. Campbell is an expert suicidologist. It was due to his more than twenty years of working with those bereaved by suicide that he introduced his **Active Postvention Model (APM)** most commonly known as the **LOSS Team (Outreach to Suicide Survivors)**. The goal of APM is to let survivors of suicide know that resources exist as soon as possible following the death. His work with survivors and victims of trauma has been featured in three Discovery channel documentaries. His model has been replicated across the US and around the world. www.losssteam.com
